LONGINUS

mealy cooking

Breeder: NÖS

Maturity: middle late

Tuber characteristics:

Shape: longoval to long

Colour of skin: yellow

Colour of flesh: cream to light yellow

Size: large

Number: medium

Depth of eyes: flat

Susceptibility to diseases:

Wart: resistant to pathotype 1

Nematodes: resistant to Ro1

Leaf roll virus: low

Virus Y: very low

Foliage blight: low to medium

Tuber blight: low

Common scab: low

Rhizoctonia: low to medium

Utilisation:

Mealy cooking table potato, especially for French fries

Remarks:

Comparatively high starch content in relation to the whole French Fries-assortment; in spite of length with stable shape of tubers
